Google Apps Sync for Microsoft Outlook® is a plug-in for Microsoft Outlook® 2003, 2007, or 2010 on Windows that lets you keep using Outlook to manage your APU Gmail account.. I have tried downloading the but there is no download link or an automatic download.. We did this as follows: • Set up an IMAP account in Outlook 2011 for email • Set up the Mac Address Book application to synchronize with Gmail, then set up Outlook 2011 to sync with the Mac Address Book via Sync Services • Set up the local iCal calendar application to synchronize with Gmail (the Outlook 2011 calendar cannot communicate with Gmail, unfortunately) Figure A shows a diagram of how this set up worked.. She could also use the Apple Mail client, but preferred Outlook 2011 We found out that some and talking back and forth between Google servers.. Several desktop email clients can be used to connect to Gmail However, this benefit can come with an unexpected price tag in the form of complex problems.. One of my users, Jill, has the sole Mac in the organization (as well as an iPhone and iPad).. I have tried Safari, Chrome and Firefox, made sure javascript was enabled and disabled all security and still nothing happens.. In some cases non-supported applications will still work fine if you have know-how and luck; in other cases some very unique problems can develop. 0041d406d9 [Avast For Mac Os](#)
